

Team NavigatorSM for Consultants

What Makes Team Navigator Different?

- Team members assess each other – not just the team
- Team members receive individual behavioral feedback from their peers (360 Feedback)
- Retreat prep for the Team Leaders + 1:1 coaching for every team member
- Customize your retreat based on individual team data and coaching insights
- Team members make team and individual commitments to improve the team

Build High Impact Teams

Team effectiveness is a critical competitive advantage, yet very few teams are truly high performing. All teams can improve, especially with expert support and an action plan based on data-driven insights.

The Team NavigatorSM process helps teams learn what team effectiveness looks like, and then identifies strengths and areas for improvement for each team member, the team leader & the team as a whole. Each team member evaluates their teammates on **three critical dimensions**:

How We Partner with You

We designed Team NavigatorSM to create a roadmap for teams interested in becoming more effective. As a trusted advisor, you are well-positioned to support the needs of a team during the change process.

Here is how a typical Team Navigator process works:

1. Confidential Survey

You provide an introduction to the process, team members rate each team member (and team leader), and we handle all aspects of survey administration.

2. Individual Coaching

With reports provided by 3D Group, you coach individual team members in preparation for a team retreat.

3. Team Retreat

Based on group results, you explore team challenges and consult to your team's unique needs. Team members make individual and group commitments to change.
